YUNO II

Universal multi-configuration integrated system

## Robust, yet compact and stylish POS system

**YUNO II** is a new generation of the YUNO POS system ; robust, stylish and compact, it suits the many applications of the POS vertical sectors.

A fanless, flexible and high-performance hardware, it offers a choice between 3 different INTEL 11<sup>th</sup> generation processors (Tiger Lake & Elkhart Lake) ; the system is available in 2 formats (traditional 4:3 15.1" screen and Wide 16:9 15.6" screen with Full HD) and equipped with a shock- and scratch-proof, multi-touch, projected, capacitive screen (10 point PCAP technology).

Very flexible, YUNO II is available with VESA fixings options (for wall or pole mounted solutions).

The standard version features a NVMe-M.2 flash disk and stands up to dirt in the toughest settings (fat, crumbs, dust, splashes and leftovers in kitchens, restaurants and bakeries). It integrates energy efficient processors (J6412, or i3-1115G4E, or i5-1145G7E) and a heat-dissipating aluminium

structure, ensuring compliance with environmental standards (low carbon footprint).

YUNO II is an accessible product whose many features (technology, ergonomics, flexibility and design) make it good value for money. It constitutes a sensible, cost effective and long-term POS IT investment.
