# EZEEPOS

## POWERFUL EASY TO USE POS SYSTEM

Built for the Android EPOS Ecosystem

# eZeePos Software

**eZeePos our 'on premise' Point of Sale software solution has been fully developed and painstakingly tested alongside brand leading Point of Sale hardware to ensure 100% compatibility, leading to reassuring high levels of reliability required in the hospitality industry.**

Our solution is simple to setup and a breeze to use and offers all the key features required for all sectors of the hospitality industry.

In addition to our 'On Premise' front end solution, every customer has access to eZeePos Office our SAAS cloud based back office solution which offers a higher tier of management reporting as well as system management from a central point. eZeePos Office works across any operating platform with a web browser application.

Whether you are managing one or many locations, eZeePos Office provides you with the flexibility to view management reports at your leisure. Highlight real-time trading information, monitor areas such as operator errors and refunds which assists in reducing shrinkage or indeed add/update product prices real time.

Recipe nesting, profitability reporting and stock inventory are all part of the rich features that eZeePos Office offers. As a SAAS cloud solution, eZeePos Office is always up to date. No need for costly & time consuming updates it is all part of the system solution.

"eZeePos POS offers a simple user interface increasing speed and efficiency which instils customer confidence."

# System Integration

**Moving to a new POS solution can be a daunting experience taking up valuable management and staff time. Buying your solution online with no 'On the Ground' help can lead to core installation and setup issues that can inevitably result in system failure.**

Our team of system provider's take away this pain ensuring the initial installation and setup is carried out professionally and is bespoke to your business operation.

Full testing is carried out on premise ensuring core networking and system infrastructure is configured specifically to your requirements

A new POS system can be stressful for staff members that's why our training takes place in your premises where staff members are more relaxed in an environment they are familiar with.

Ongoing support is part of the whole package offered by eZeePos System Provider's.

Whether you are looking for advice over the telephone, remote access to your system or a site visit from our local System Providers you can rest assured that on-going support is only a telephone call away.

## Why eZeePos?

- Robust and feature rich solution developed and supported by POS businesses who know the hospitality industry.

- We offer an end to end solution from hardware to software which ensures complete harmonisation on every aspect of your new POS solution.

- Complete on-site system installation, testing and training.  Ensuring management and staff are 100% confident in system operation.

- On-going system support and 'hand holding' from one of our qualified system providers.

- Nationwide coverage via our reseller network.

### Compatibility
Tried, tested & fully compatible with iMin Hardware.

### Experience
Knowledge of POS & Hospitality industry.

### Nationwide
We cover the whole of the UK via our reseller network.

### Cost Effective
An affordable solution with a quick return on investment.

# Simple to Use

**Our solution is so easy to use, that staff members can be fully trained in less than 20 minutes. Although the solution is one of the most feature rich POS solutions in the industry, providing a wealth of management reports, its designed to reduce shrinkage.**

The user interface is so easy to use new staff members can be up and running in no time at all. Our system delivers fast clerk lay-away or tab operation across multiple terminals as well as easy to use table management, split billing and fast tendering.

With lead thru operation prompting cooking instruction, up selling or cross selling features you can rest assured that the operation is kept simple for the operator but provides every opportunity to increase average transaction value.

Ongoing system maintenance, including product changes, menu changes or screen changes can be completed either on the POS terminal or via our cloud based solution eZeePos Office.

Monitoring stock shortage or identifying staff error notification is only a small part of the cloud based back office solution. With a wealth of management reports available at the touch of a button, eZeePos Office offers an easy to use back office solution cutting down mundane tasks.

### Easy Training
The user interface is simple & intuitive making system operation simple.

### Speeds Up Operation
A well-designed system, speeds up operation & reduces shrinkage and waste.

### Customer Satisfaction
Professional, quick & accurate service leads to customer confidence.

# EZEEPOS
## Key Features

### HOSPITALITY

# Floating Operators & Tabs

**As part of a multi-POS operation, it is important that operator's can move around a system easily. With eZeePos any operator can start a Sale/Tab on one terminal and add to or finalise the sale on another terminal reducing bottle necks and speeding up service.**

Operators can quickly move a tab to a Table/-Check anywhere in the system ensuring no transactions are lost. Operator accountability is crucial to the smooth running of your business.

eZeePos POS and eZeePos Office provide a high level of management reporting available for each operator.

Whether you are reconciling each operator individually or tracking sales performance at either product level or category level, eZeePos provides easily readable reports to analyse your operators performance.

eZeePos Office also displays Pop-Up Notifications on the dashboard if your operator carries out an operation that you want notifications on. For example: voids & refunds or any other areas that may be susceptible to abuse.

"Operators can quickly move a tab to a Table/Check anywhere in the system ensuring no transactions are lost."

### Unlimited Operators
Unlimited operators can be added to your point of sale system.

### Unlimited Table
There are no limits to the number of tables, checks or Tabs .

### Reporting
Full reconciliation and sales reporting is available per operator.

### Synchronise Transaction
Operator sales are synchronised throughout the system.

# Dynamic Screen Setup

**Adding new products or specials to a touch screen system can be tedious. First creating the product information and then assigning it to the relevant screen.**

We understand how time consuming this can be so have 'lightened the load'. With the eZeePos 'Dynamic Screen' feature all you need to do is create the product, assign it to a category. i.e. Starters, Mains, Desserts etc. and eZeePos will do the rest.

Products can be assigned to different categories, so they can appear on different category screens. For example an item maybe sold as a starter or a menu course or also feature on a specials board.

The drop down category selection at the top of the screen is so easy to use and operate. Sales Orders can be completed in a matter of seconds with the fast refresh speed of the iMin Android terminals.

For multi-terminal sites it makes sense to standardise the configuration throughout the business. With terminals' carrying out different functions such as bar or front desk operation, It's simple to tailor a terminal to it's actual function.

"With the eZeePos 'Dynamic Screen' feature all you need to do is create the product, assign it to a category."

### Quick & Easy Product Creation
Adding new products is simple with eZeePos.

### Fast Operation
Optimised for quick performance on Android latest operating systems.

### Vivid Definition
Utilising the quality PCT touchscreen offering high definition fast refresh performance.

### Best Practise Interface
Designed by people who know the industry offering best practise system operations.

# Remote Services

**To further enhance efficiency and increase service accuracy and adopt best practice operations within your establishment, eZeePos Software offers a range of remote services.**

Utilising iMin handheld devices, operation at the table, speeds up service and dramatically reduces wrong orders, enhancing customer experience. What's more the software operation on the hand-held device is an exact extension of the fixed terminal operation, so operators don't require further training to use the table ordering solution.

Remote order printing to the bar prep areas and kitchen service areas again improve accuracy, speed up service again leading to a better experience for the customer.

For fast food operations, kitchen order monitors can offer a more efficient and cost-effective solution to kitchen order printers.

Used by many of the big fast food chains kitchen order monitors display on going orders as well as a snap shot of the meals that need preparing real-time.

“Utilising tablet operation at the table, speeds up service and dramatically reduces wrong orders, enhancing customer experience.”

### Best Practise Operations
Designed for the hospitality industry to instil best practise operations.

### Accurate Order Processing
Lead through options to ensure the right questions are been asked during order taking.

### Faster Table Turnaround
Orders instantly processed through to the kitchen for faster food prep.

### Improved Customer Experience
Faster order processing, less mistakes in food delivery and accurate billing.

# Promotions

**A large part of the hospitality business is about offering a range of promotions to entice customers.**

The eZeePos solution facilitates definable promotions and discounts that are easily setup either within eZeePos or on eZeePos Office. These wide range of promotion options allows management to easily incentivise and influence customers spending trends.

Promotions can be actively monitored, allowing management to easily adapt promotions for maximum benefit. Whether you are looking to implement a simple 3 for 2 deal or a range of complex promotions, eZeePos has the capacity to deal with a wide range of promotional algorithms.

Unlimited number of promotions can be preset within eZeePos allowing you to keep promotions up to date and exciting to the customers.

In addition, price changes can be scheduled to be updated on a certain date and time.

"eZeePos has the capacity to deal with a wide range of promotional algorithms."

### Wide Range Promotional Options
We offer a wide range of promotional algorithms built into eZeePos.

### Easy Implementations
Promotions can sometimes be quite complex but are easily created in eZeePos.

### Incentivise Customers
Promotions can influence and incentivise customers spending.

### Time Activated
Promotions can be activated on different days or time of day.

# Food Allergens

**As a food business, you must follow the allergen information rules set in EU Food Information for Consumers Regulation (EU FIC). This means that you must:**

Provide allergen information to the consumer for both pre-packed and non-prepacked food or drink, handle and manage food allergens adequately.

You need to tell your customers if any food products you sell or provide contain any of the main 14 allergens as an ingredient.

- Celery.
- Cereals containing Gluten – including Wheat (such as Spelt and Khorasan), Rye, Barley & Oats.
- Crustaceans – such as Prawns, Crabs & Lobsters.
- Eggs.
- Fish.
- Milk.
- Lupins
- Molluscs – such as Mussels and Oysters.
- Tree Nuts – including Almonds, Hazelnuts, Walnuts, Brazil Nuts, Cashews, Pecans, Pistachios and Macadamia Nuts.

- Mustard.
- Peanuts.
- Sesame Seeds.
- Soybeans.
- Sulphur Dioxide and Sulphites (if they are at a concentration of more than ten parts per million).

"Provide allergen information to the consumer for both pre-packed and non-prepacked food."

### Information Quickly
Provide customer with relevant product information quickly.

### EU Food Regulations
Assists in meeting current regulatory food guide lines.

### Products Management
Easily maintain product information through eZeePos Back Office.

### Paper Records
No more paper records at the front desk.

# Product Sizes

**eZeePos offers up to 3 different size levels per product. These can be used in many different scenarios typically, Small, Med, Large with different price points**

In addition to size selection, we can also add things like cooking instructions, variation in product and aed extras.

As an example a burger may come in two sizes, Single or Double.  The burger bun may have a number of selections:– Seeded, White, Brown etc.  We can add or remove selections such as "Add Ketchup" , "No lettuce" and so on.  Additional, "up sell" selection can be added to the order.

The advantages of lead thru operation is firstly to prompt the operator to ask about extras potentially increasing  average sales value, Secondly, to ensure that the food is prepared to the customers exact requirements, leading to a greater level of customer satisfaction.

Any cooking instructions are then automatically sent through the the Kitchen Order Video screen, so chef has an exact knowledge of the customers requirements.

"eZeePos software offers lead thru products orders."

| Size Levels | Cooking Instructions | Add Extra | Customer Satisfaction |
|---|---|---|---|
| Up to 3 Different Price Levels Per Product. | Lead thru sales prompt operator to ask questions | Lead thru sales, prompts the operator to ask about extars | Food prepared to the customers exact requirements leads to greater customer satisfaction |

# Report Dashboard.

**The end of day report available on the terminal is easy to read and informative.**

The end of day information is very simply illustrated with key analytics in graphical format.

Information such as total sale, sales by time period, sales by operator and information such as sales by groups.

In addition you can refer back to the same day last week and the previous day.

Information can be reported on a selected day or consolidated information from all terminals at the premises.

A wealth of indepth reports are also available from eZeePos back-office which is supplied as part of the ecosystem

"Simple, easy to read reports available at anytime"

### Graphic Report
Simple to read analytics with key indicators to performance at the drop of a hat

### Comparisons
Compare sales across different days easily with the report dashboard

### InDepth Reports
For indepth & detailed reporting this is available via the eZeePos Cloud Back Office

# Cloud Accounting

**eZeePos's simple integration stops the need for double entry of your sales to Xero Accounting. Our integration to Xero is supplied as part of our eZeePos Office back office solution at no extra cost. Pay your standard Xero Accounting software charges and there is no other added costs.**

Xero accounting is one of the most popular small business accounting solutions, which is recognised by the major accountancy companies throughout the UK.

Xero's low monthly cost as well as its simple user interface has made it one of the most popular cloud based accounting solutions available on the market today.

Category sales are posted to your Xero nominal along with receipt to allow you to reconcile to your bank. Currently, integration doesn't take into account stock or credit account transactions.

From bank reconciliation to VAT returns, Xero offers a fully encompassing small business accounting solution.

There is a wealth of online information available to guide you through the start-up right through to every day tasks.

**Easy Invoicing**
Create professional recurring invoices and receive updates when they're opened.

## Fast Bank Reconciliation
Your latest banking, credit card and PayPal transactions are imported and categorised.

## Inventory
Inventory items speed up invoicing while tracking sales and purchases. Stay on top.

## Payroll
Reduce manual data entry and increase compliance with combined payroll and accounting.

## Easy Invoicing
Create professional recurring invoices and receive updates when they're opened.

emerchantpay

# Trusted Payment Solutions

## All you need from one payment provider.

- **Best rates.**
  Never pay more than you need to

- **Full Solution.**
  Stand-alone, counter top, At table, & App payment solutions all under one roof.

- **Fast Settlement.**
  Get your payments quicker

- **Secure Solution.**
  Fully PCI Compliant for total peace of mind.

- **UK Support.**
  24/7 support here in the UK.

- **Latest technology**
  Keep ahead of the game with the latest payment technology.

# Card Integration (EFT) Sector

**Looking for a new EPOS system with integrated credit card payments? Then, eZeePos has a number of credit card solutions available that can be combined together in your operation**

Fed up of the big banks? Want more for your money? Look no further. We're throwing out the rule book, doing things differently and putting our customers first. With integration with eMerchantPay, we are able to offer either countertop EFT integration or mobile integrations with very competitive transaction charge fees.

Our range of EFT terminals help you take money on the move, around your premises or at the POS. In addition, our solutions allow you to take payment online, pay over the telephone and pay by link systems to suite all your business needs.  The credit card industry is moving at great speed at the moment and we continue to add new technologies to credit card payments solutions

With full PCI Compliance, our Card Payment providers will talk you through the "red tape" that comes with taking credit card payments. As part of the system installation and on-boarding process our system provider's will ensure that your POS terminal is configured to work with you card payment terminal.

### Ready For Anything
UK-based team are available 24/7. They're a friendly bunch whose mission is to make things easy for you.

### Integrated Payments
Lets your card machine and till talk to each other for simpler sales – and we're the only ones offering it at no additional cost.

### Strength In Numbers
What do you get when you combine the power of 70,000 small businesses? We use our size to negotiate with banks.

# EZEEPOS
## Additions

HOSPITALITY

# eZeePos Kitchen

**Transform the way orders are handled in the kitchen using the latest technology from eZeePos. When orders are taken front of house, order tickets are transferred to a touch screen terminal located in each preparation area.**

Each order is shown as an individual ticket with information such as Table#, Guests, Time Taken, Collection Time. A summary of all the items that need to be prepared are consolidated on the screen so chef can see at a glance what needs to be prep'd.

No more lost tickets; digital tickets go a long way to reducing litter in the kitchen as well as helping the hospitality environment and cutting costs in paper rolls too.

Just in case an order has been missed alert times can be pre-set in the system to advise chef that an order has not gone. All in all, eZeePos Kitchen offers a range of features to speed up operation, minimise wastage and reduce stress levels in the kitchen.

eZeePos Kitchen comes with Android operating systems and will work on any iMin POS touch screen.

### Consolidated List
A comprehensive list of all the orders recieved but yet to be prepared.

### Pinned Orders
See the status of current orders being prepared whilst 'pinned'.

### Just In Case
Alert times can be pre-set in the system to advise chef that an order has not gone.

### Unpinned Orders
'Unpin' orders once the order is prepared and ready for collection or delivery.

# eZeePos On-The-Move

**eZeePos** is designed specifically around the full range of iMin Point of Sale devices.  A range of the devices have 3G/4G capability which means that a data sim can be installed into the device to enable internet connectivity, wherever you are located.

Using advanced data sims designed for IT technology our data sims are capable of using any network provider that is available at your location.  So, if EE is the strongest network at your location EE will be used. If VodaFone is the strongest network then  their network will be used.  You pay only one monthly charge  for the amount of data used irrespective of the provider that you use.

### EFT Credit Card Device

eZeePos integrates with eMerchantpay's Handpoint Hilite credit Card terminal which then uses the same data network for credit card transactions, so you can be assured that card payments can be taken if any of the data network providers are availale.

### Uses:-

eZeePos and card payments can be taken even if you have no internet connection using our IT standard data sim.

So for take-away with no internet, mobile vans, exhibitions or pop-up catering points we have a solution available

### Keeps Everybody Happy

CLOUD OFFICE

# Cloud Technology

**eZeePos Office our SAAS solution provides hospitality businesses with the flexibility required in a demanding industry.**

The continued growth in internet & mobile technologies means that you can access your data anytime, any-place anywhere allowing you to run your business wherever an internet connection is available.

eZeePos Office and cloud technology is the perfect partner to a growing business allowing you to act on data instantly.

Whether it be stock inventory, detecting shrinkage through void or refund notifications or fast menu and price updates. eZeePos Office provides the management tools to keep you ahead of the game.

By adopting cloud technologies your back-office solution is up to date as soon as a release becomes available.

No more costly software updates the utilisation of cloud technologies means your system is always up to date and features are added at no extra cost to you.

"eZeePos Office and cloud technology is the perfect partner to a growing business allowing you to act on data instantly."

### Instantly Updated
Access your data anytime, any-place anywhere allowing you to run your business.

### Management Tools
eZeePos Office provides the management tools to keep you ahead of the game.

### No Down Time
Detect shrinkage through void or refund notifications plus fast menu and price updates.

### Latest Version
The utilisation of cloud technologies means your system is always up to date.

# Remote Management

**You can access your entire back office system securely on any device with a web browser anywhere in the world. Whether keeping an eye on turn-over, updating menu's or prices, checking inventory levels or running sales reports.**

The eZeePos Office portal allows you the flexibility to check on business performance whilst you are away from the premises.

eZeePos Office our cloud based back office SAAS solution is supplied at a low monthly cost solution, reducing your initial outlay for your system.

There are no expensive hardware costs as your existing PC or tablet can be used to process your information. As new updates come on stream your platform will be automatically updated, so your system is always up to date with new features and enhancements.

You can rest assured that your data is safe as we host all solutions on Microsoft Azure. With over 3,500 cyber-attack experts working 24/7, 365 days a year, the highest level of security is ensured.

"The eZeePos Office portal allows you the flexibility to check on business performance whilst you are away from the premises."

### Secure Connection
Hosted on Microsoft Azure who provide the highest level of security, ensuring your data is safe.

### Low Running Costs
No need for expensive PC hardware, just a low-cost monthly charge.

### System Updates
All new features and enhancements are added to your system automatically.

### Works With Any O/S
eZeePos Office will operate on either Windows, Android or Mac operating systems.

# Inventory Stock Control

**Take control of your stock via eZeePos Office. Full or partial stock counts can be carried out instantly with stock variances highlighted quickly, backed up with intelligent reporting.**

If you are controlling ingredients, barrels, wine bottles, eZeePos Office automatically controls different sales units or recipe nesting and explodes inventory into its component parts.

The recipe & sizes features allow you to analyse individual meals based on ingredient costings and indicate a sell price based on your margin.

As ingredient prices increase intelligent reporting highlights your shrinking margin providing you with the tools to manage prices accurately.

Automatic dash board alerts signal low stock levels for you to act on ensuring you never run out of stock on key ingredients.

Supplier order reports can be run instantly and provide recommended order levels based on current stock and product trends.

"The recipe & sizes features allow you to analyse individual meals based on ingredient costings and indicate a sell price based on your margin."

### Recipe & Sizes
Analyse individual meals based on ingredient costings and indicate a sell price.

### Intelligent Reporting
Highlights your shrinking margin providing you with the tools to manage prices accurately.

### Dashboard Alerts
Signal low stock levels for you to act on ensuring you never run out of stock on key ingredients.

### Multi-Location Businesses
Analysis stock inventory across the group and move stock as necessary.

# Employee Management

**Cutting down shrinkage, misuse and errors is a simple way to increase profitability and improve customer retention.**

eZeePos Office provides a range of notifications to highlight voids and refunds or any other area's that may be susceptible to abuse.

Monitor staff sales performance against increased profitability. Intelligent reporting provides average spend per operator, tracks sales performance i.e. monitor starter or dessert sales.

Identify employees who may need further sales training in promoting specific range of products or require further POS training to reduce operational errors.

Keeping track of staff working hours can be time consuming. eZeePos Office offers a simple but effective time and attendance features that tracks staff working hours and provides easy to read reports.

"Intelligent reporting provides average spend per operator, tracks sales performance i.e. monitor starter or dessert sales."

### Highlight Employee Training Needs
Looking at sales trends across operators can highlight training needs.

### Reduce Shrinkage
Accurate pricing, monitoring over rings and refunds can reduce shrinkage.

### Customer Bills
Build customer confidence with easily readable customer receipts.

### Time & Attendance
Keep a check on hours worked by all staff members.

# Sales Reporting

**The combination of eZeePos & eZeePos Office offers a wealth of sales reports which are constantly being updated real-time, ensuring that any report you take is "bang up to date".**

Whether you are looking at Financial sales information, Staff Performance, Stock Valuations or Profit reports the eZeePos suite provides you with the management tools to make fast decisions about your business performance.

For multi-site businesses your eZeePos Office suite is the hub to business performance indicators. Whether you are looking at a bird's eye view of all your businesses or drilling into a specific business or indeed an individual POS terminal.

## Sales Alerts

Sales alerts are an intrinsic part of system alerts built into eZeePos Office. With real-time monitoring of refunds, voids you can keep ahead of staff operations as they happen, helping to reduce shrinkage within your business.

## End Of Day Reporting

End of day reporting couldn't be simpler either instigated at the POS terminal or via eZeePos Office. Again, reports can be taken on individual terminal or consolidated terminals at POS level.

**Financial Totals By Location**

From:  To:

| YCR Distribution Limited | | |
|---|---|---|
| **TRADING** | | |
| TRADING | | |
| GROSS SALES | 1308.00 | £3,278.04 |
| NET SALES | 87.00 | £2,900.19 |
| **TRAINING** | | |
| TRAINING | | |
| TRAINING TOTAL | 1.00 | £0.00 |
| **IN DRAWER** | | |
| MEDIA IN DRAWER | | |
| CASH IN DRAWER | | £2,900.19 |

# Security & Recovery

**eZeePos Office our 'software as a service' back office solution is hosted on one of the most secure infrastructures worldwide. Security is integrated into every aspect of Microsoft Azure.**

This powerful combination helps protect your applications and data, support your compliance efforts, and provide cost-effective security for organizations of all sizes.

As part of eZeePos Office we 'snapshot' a copy of your local POS solution. In the event of hardware failure we are able to restore the POS terminal to its last known restore point for quick system recovery.

This service is provided as a fail-safe system recovery for our support team and is not a substitute for your own backup processes.

- **Security** – Hosted on one of the most secure networks worldwide.
- **Restore Point** – We snapshot a copy of your POS system for backup recovery.

- **Performance** – Azure is a scalable solution that automatically increases resources as required.
- **Updates** – System updates are added seamlessly without any intervention from the user.

In the event of hardware failure we are able to restore the POS terminal to its last known restore point for quick system recovery.

**Microsoft Azure**
Azure offers you unique security advantages derived from global security intelligence.

**Business Snapshot**
In the event of hardware failure we are able to restore the POS terminal to its last known restore point.

**Scaleable Solution**
Microsoft Azure is a scalable solution that automatically increases resources as required.

**Latest Version**
The utilisation of cloud technologies means your system is always up to date.

# Product Management

**In the hospitality industry we have found that there are a wide range of requirements from the EPOS solution in relation to product management.**

Whether you are creating recipes, product modifiers or promotions your system has to work with you and offer an easy interface to execute the required features.

With eZeePos and our back-office solution eZeePos Office product maintenance couldn't be simpler. The information we hold about each product is comprehensive, however we have managed to represent this on one easy to read product screen.

Whether your business operates a range of price levels, product sizes, loyalty points or a range of kitchen order printer's the product maintenance screen is simple to follow and update.

Whenever a product is updated it is seamlessly posted around the network so instantly your products are updated. Alternatively, you can schedule updates that will take place automatically.

Maybe you have a special event or price update pending, leave eZeePos Office to update your system automatically.

"eZeePos and our back-office solution eZeePos Office product maintenance couldn't be simpler."

**Easy Access**
Product information all under one easy to read screen layout.

**Product Info**
Comprehensive product information to meet hospitality requirements.

**Schedule**
Automatically schedule product price changes and updates.

**Maintenance**
Product maintenance and price updates updated seamlessly.

## Data sim – for mobile caterers.

## Data Sim

For mobile caterers or establishments that have no internet connection. The eZeePos Datasim is an IT Services data sim specifically designed for the IT industry. The main advantage of this type of data sim is that it works across all mobile providers such as EE, Vodafone, O2 ensuring that you have connection whatever your location. The data sim will also operate in europe at no extra charge.
