

CountEasy & CountEasy IP

With over 50,000 CountEasy units in daily use, you can depend on its tried and tested technology to perform spot checks, cash lifts, banking, shift changes and end of day reconciliations with 100% accuracy and in a fraction of the time it takes staff to do the same tasks manually.

Order the CountEasy IP for all of the **operational benefits** of the standard CountEasy, but with the added advantage of an integrated printer. This allows the cashier to sign a hard copy printout of every count, giving better accountability.

The CountEasy takes the “handling” out of your cash handling...

- Fast and simple to check coin bags and note bundles
- Future proofed to accept new notes and coins
- Unique FlexiCup makes filling coin bags with counted coins quick and simple
- Keeps a real-time running total, so you always know where you are in the count
- Small footprint takes up minimal desk space
- Portable so you can count anywhere, even without a power socket nearby
- Allows you to balance a drawer quickly, even in front of customers in case of a change dispute
- Weighing mode allows you to weigh non-cash items such as vouchers
- Intelligent learning software means notes in all conditions and environments are counted accurately
- Unlike some machines there is no need for regular recalibration
- Complete peace of mind with Volumatic’s highly respected customer support offering, which includes a five year box swap warranty

- **Want to transfer data to your cash spreadsheets automatically?**
CountEasy Connect software allows data to be downloaded instantaneously to your cash spreadsheet, saving even more time and eliminating errors
